

Strategic solutions enhancing project outcomes

Maximising project outcomes requires a comprehensive understanding of the organisation, people and project objectives.

AK Project Solutions will ensure your project successfully delivers on these objectives by developing strong working relationships with all project stakeholders.

AK Project Solutions will enhance your project outcomes and ensure delivery on time and to budget by applying relevant core competencies such as:

- Scope preparation and management
- Project feasibility and review
- Risk identification and management
- Stakeholder appointment and coordination
- Quality assurance
- Scheduling
- Cost planning and reporting
- Procurement
- Change management

Design / Development Projects

Through early engagement we will add value to the following project stages:

- Site identification
- Preliminary development feasibility
- Design team identification
- Design development & town planning
- Costing & preparation for construction

Construction Projects

Drawing on a diverse experience base we provide the following service:

- Preliminary project cost analysis
- Tender preparation and review
- Project team coordination
- Project cost reporting / review
- Project scheduling
- Project closeout / defects review

Business Projects

Applying strong PM skills we provide a range of business project solutions including:

- Plant & Equipment design & installation
- Change management
- Business / production process improvement
- Business relocation / facility upgrades

Project Experience

Commercial Projects

Commercial project experience including car dealerships, office buildings and police forensic laboratories, with involvement across design development, town planning and construction. These projects presented detailed and exacting finish specifications.

Medical & Multi Residential Projects

Project experience ranges from inner Sydney CBD medical centre fit outs to 30 unit multi residential projects. These projects demanded a high level of detailed design and fit out understanding and presented complex inner city site conditions requiring coordination with a range of stakeholders.

Industrial / Resource Projects

Industrial and resource project experience spanning Australia including large warehousing, power generation plants and mining projects. These projects demanded a high level of quality control and process understanding to meet the delivery specifications of clients such as BHP, Downer EDI & Bilfinger Berger.

Business Process / Plant Upgrade Projects

We have experience developing business systems and processes across a range of industries. Notably, project management of a major plant upgrade (~\$3.5M), including financial feasibility, international machine procurement, installation management, process identification and change management.

Formal Qualifications / Association

- Master of Property Development - UTS
- Bachelor of Construction Management - UoN
- Member Aust. Institute of Project Management
